Messrs. Shawn and Ron Bishop
Corner to Corner Construction
161 Leverington Avenue
Unit 102
Philadelphia, PA 19127

Dear Shawn and Ron,

Dan and I want to let you know just how pleased we are with the kitchen project. The results were well beyond our expectations. We are especially ecstatic at how well your idea of bumping up the ceilings and incorporating sky lights into the design came out. It gave the space a whole new dimension and drama. I love the natural light which seems to make the space glow. It truly turned out to be more than just a kitchen remodeling as it has transformed the entire kitchen/dining/living room into one spectacular living and entertaining space.

Just as important as the overall esthetics of the project, however, was the manner in which it was accomplished. Not only were we impressed with your unique design ideas, we were very satisfied with the overall quality and workmanship of the final product. There is an integrity to your work that was evident early on. Our concerns were addressed as they arose in a timely manner, just one example of the professionalism displayed throughout the project. We also feel special mention is warranted for project manager Bob Jackson, who displayed a unique blend of skill and personality for what I'm sure is a very challenging position. We appreciate that he was available on numerous occasions beyond traditional working hours, and he always responded quickly to our questions. We also appreciated your "punch list" philosophy which ensured that final details were completed to our satisfaction.

In closing, we would recommend you wholeheartedly to friends, family and neighbors. Everyone who has seen the completed project has been stunned at the result. It was a very emotional project for us. Having a kitchen totally gutted, reconfigured and remodeled is traumatic enough, but you brought such professionalism to the project, I was happy to find my concerns were unfounded.

Dan and I enjoyed working with you, and we are so satisfied with the results of this project, that we expect you to carve out some time in your schedule next year to help us redesign and finish our basement. We look forward to your ideas and working together again in the future.

Sincerely,

Connie and Dan Maher
